The Descending Moon at the Foot of the Mountain

달이 내린 산기슭

Son Jong-Won

#009

When I was making a geological map earlier I didn't know that there were a fault near the river that I knew was that the stratum there is deformed!! ... the opposite side of the river!

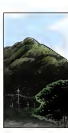
Why in the nature spot I couldn't the road? It's road or excavation guerrilla type!... or like part of agent with it's there was city?

So beside the large fault, there are a lot of smaller faults and the stratum gets distorted all over.
As such being, this human-shape, on Go have need not be able to see her.

The most problematic fault near here is the Kang Jeom fault.
shi. woosh

When I was doing research that fault caused me a lot of trouble.

If you go behind the fence, there's a hiking trail.



It rained yesterday, but now the ground is dry.
Right.

You didn't fix mud on your suit case, but it's fine?

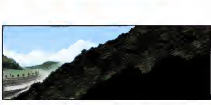
Eh... Not really.

You're healthy

Usually, kids don't get tired.

We have to climb to the top, so let's go slowly

Wimp
Yes.



Ha. Are we almost there?

Can you see the entrance to the fort there?

Left... oh

Yes, it's here.

Hm.

You haven't done research on
this area - maybe fascinated it
hard to start up here
That's part of it. But it's
also because the hard
formation is difficult to
break and carry down
There are rocks like this
spread out from the bottom
to the top of the mountain.
There's Gaoang formation
strata and that is one of
lower-Rhee Asia formation
stratum
Yes.

TN A Gaoang formation contains mixed sediments called tectonic deposits which often have ripples in outcrops. The Rhee Asia* formation denotes limestone from the Rhee geo-era. We find parts of the Gondwana period

Mark is better than me at climbing mountains and she never gets lost.
Yes.

She's right there on the top.

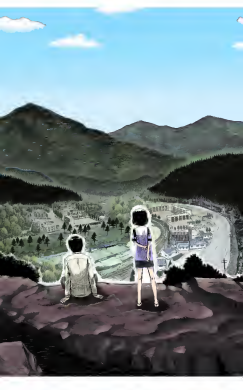
I can't see her...

I'll go up and play with her so my name hasn't fame.
Ok.

Phew

You're finally here

You're the one who is too fast



On the top of the high mountain
You can only see the mountain

This high up, the villages and people look tiny.

It feels rather good.

Is it like that for most people, or is it just you?

Uh, sit down

To be continued..
